3-in-1 Router Especially Designed for Small Business and Home Network

ASUS RT-N300 B1 is a 300Mbps Wireless N Router with both wired and wireless network connections designed specifically for small business and home office networking use. With 2T2R MIMO Technology and the external high-performance antenna, the RT-N300 B1 creates an extended coverage area with advanced wireless performance, making it ideal for streaming HD video, placing VoIP calls and online gaming. With the ASUS unique Quick Internet Setup and Graphical User Interface, the RT-N300 B1 is easy for anyone to install and manage, even for novices!

Powerful wide-range coverage

Enhanced signal strength and wider coverage for larger homes and offices are driven by two external high-performance antennas. The design is also ideal for multi-floor locations with devices located on different levels.

Dedicated Wi-Fi for your visitors

Share your internet connection with your guests with no need to share your personal password or network resources. ASUS Guest Network supports up to three separate guest networks, each with its own usage limits and password. Guests cannot access your primary network or any other connected devices.
